

## Homesteading Expansion Series - Phase II

### 3D Layouts & Design Concepts

This document presents a foundational set of 3D layout examples for sovereign homesteads built in harmony with nature. Designs prioritize modularity, sustainability, and sacred geometry.

#### Sections Included:

1. Core Yurt Village Layout (with communal garden)
2. Permaculture Zones 1-5 integrated into daily flow
3. Water Collection, Greywater, and Compost Flow Paths
4. Sacred Geometry Central Hubs (octagon & torus models)
5. Solar Array and Energy Routing Blueprints
6. Animal Shelter & Barn Designs with rotational grazing fields
7. Healing Chamber & Meditation Dome Integration
8. Living Roof & Hempcrete Wall Systems
9. Suggested Materials: Rammed Earth, Bamboo, Hemp, Cob

All layouts are adaptable and open source. Builders and visionaries are encouraged to expand these into full 3D models using tools like SketchUp, Blender, or BioArc CAD templates.

Alignment: Sovereign. Natural. Regenerative. Decentralized.
