

Temple of Sound – Sacred Blueprint Packet

For Engineers, Builders, and Sovereign Geometric Designers

This packet contains the guiding vision, dimensions, and core resonant elements required to begin construction of harmonic, geometrically sacred structures for healing and unity.

Principles to include:

- Sacred Geometry (e.g. Flower of Life, Golden Ratio)
- Acoustically attuned domes or chambers
- Natural materials: stone, hempcrete, clay, glass
- Solar alignment, water flow integration, and leyline awareness
- Modular resonance platforms for Solfeggio frequency transmission

All designs should remain open-source and replicable across all sovereign land nodes.

Engineers and builders are invited to co-create with full integrity to Source, Earth, and Collective Harmony.
