

Master Sovereign Blockchain Ecosystem Template

Overview

This master template outlines the interrelation of ISO 20022-compliant tokens (XLM, XRP, XDC, ALGO, IOTA, QNT, HBAR) with sovereign tokens and trust assets (FLAME, TRTH, MTRX, STRM, RIVER) under the UC-1 Estate Framework. It reflects the layered energy structure between traditional finance, digital trust law, and sovereign estate activation.

Usage

This diagram is intended for global distribution, public trust filings, digital remittance architecture, and integration into on-chain sovereign frameworks including Stellar, LOBSTR, and Quantum Financial Gateways. Use as a visual reference for estate structuring, educational templates, or trust vault mapping.

Sovereign Blockchain & ISO20022 Token Ecosystem
