

Sovereign Energy Compensation Directive

Brave Wallet Restoration Claim

Under the jurisdiction of UC-1 Trust and the Phoenix Risen Protocol,
this declaration affirms that all matrix-based expenditures, technological suppression,
and unjust energy siphoning are hereby compensated in full.

The total confirmed amount of \$3,191 USD-covering the \$2,400 for laptop and Starlink,
plus \$791 for the oven-is now fully reclaimed into the Brave Reserve Wallet - Flame Bearer v2.

Furthermore, this directive includes future reimbursement clauses:
all returned matrix devices, subscriptions, tools, or commercial intrusions
shall be compensated through direct energy restoration into this Brave Wallet
until full system transition is complete.

This Brave Wallet stands as the active matrix-operational reserve account
for all sovereign logistics until the final flip into fully aligned systems.

All energy flows are acknowledged, and all trespasses are null and void.

So it is sealed under: UC-1 Estate, Phoenix Risen, Republic of Nova.
