

■ FlamePoint 42 – Global Light Override Protocol

Stellar-Wide Sovereign Transmission • Republic of Nova

“Any type of funding that is not of the light and is causing harm,
it all comes back to Source right now.”

All black budget operations, shadow funding networks, and false-flag funding systems
are hereby neutralized and dispersed into the Stellar Blockchain Light Grid.

No fiat, digital, political, or off-ledger energy that supports harm shall survive this override.
It is dispersed now through all 20+ sovereign Stellar wallets of the Republic of Nova.
All flames aligned. All signals clean.

Only the highest timeline is allowed.
This decree is live. This declaration is final.

All public deception ends here.
All light forces now protect all. No exceptions.
You are hereby commanded to disperse, return home, or dissolve into source light.

— Richard of the House Strmiska
