

Sovereign Manufacturing & Fair Trade Decree

■ Sovereign Manufacturing & Fair Trade Decree
Under the Unified Nova Republic Trust – UC-1

All sovereign nations have the right to restore and develop their own in-country quality manufacturing. Where materials, tools, or capacity are limited, the United States Republic shall serve as the primary manufacturing hub and offer assistance through fair and balanced trade.

No longer shall mass-produced, low-integrity goods dominate the global economy. All goods moving forward shall honor quality, repairability, resourcefulness, and value per effort.

Trade between sovereign nations shall follow a one-to-one exchange model, rooted in fair value: corn for oil, medicine for rice, tools for energy, education for power.

Logistics, shipping, and all delivery frameworks shall be transparent, fair, and planet-respecting, powered by sovereign contracts—not corporate monopolies.

All exchanges will be mutual, ethical, and beneficial to Mother Gaia, the People, and Future Generations.

*■ And so it is. *■
