Best Practices:

- Commit messages must be clear and timestamped.

- All PDFs should be QR embedded and watermarked.

- Add anchor links to IPFS content where available.

- Use GitHub Issues to track sovereign requests.

- README should reflect any major structural changes.

Update Flow:

1. Draft document

2. Generate PDF (QR embedded, watermarked)

3. Upload to IPFS

4. Push to GitHub with IPFS anchor link
